DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Housworth et al. USPN 5,443,485. Houseworth examiner polarization artifacts associated with a stimulation pulse to determine whether capture or noncapture has occurred. In doing so, when first signal features are such that the integrals corresponding to integrals W1 and W2 are both high, noncapture is determined. When a second signal with features that cause integral corresponding to W1 to be high that corresponding to W2 to be low, capture is determined to have occurred.

Response to Arguments

Applicant's arguments with respect to claims 1-3 and 33 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 4-6, 8, 14-18, 26-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
